# About Me

I am a Data Analyst passionate about turning raw data into  
.meaningful insights that support business decisions

I have hands-on experience in Excel, Power BI, SQL, and  
.Python through personal projects

I enjoy data cleaning, analysis, and building interactive  
.dashboards

My goal is to continuously develop my skills and contribute  
.to data-driven decision making

## 🔗 Description

Interactive Marketing Dashboard analyzing sales performance, customer purchases, conversion rate, revenue vs cost, top-selling products, and sales channels to evaluate business growth and customer behavior.

## Tools

Power BI | Power Query | DAX

## 🧠 Insights

Conversion Rate reached 3.56%, showing stable customer purchasing behavior.  
Revenue remained higher than cost across all months, indicating positive business performance.

July recorded the lowest sales performance compared to other months.  
Most products were purchased through single-buy orders rather than installments.

Main Need Products were the top-selling product category.  
Store and Catalog channels generated the highest sales performance.

## 🧠 Insights

Conversion Rate reached 168%, showing strong campaign performance.

Users aged 25–55 had the highest CTR.

Facebook generated higher impressions and engagement than Instagram.

Impressions were the highest KPI across the campaign.

CTR, clicks, and conversions showed strong audience interaction

## 💡 Description

Interactive Social Media Ads Performance dashboard analyzing CTR, Conversion Rate, ROAS, impressions, clicks, and audience engagement across Facebook and Instagram campaigns.

# Mercedes Benz Global Sales Analysis

## Description

Built an interactive Car Sales Dashboard to analyze vehicle sales, pricing trends, fuel types, horsepower, and customer preferences across different car models, colors, and years from 2020–2025.

## Tools

Microsoft Excel | Power BI |  
Power Query | DAX | Data  
Visualization | Data Cleaning

Total Sales  
Volume  
12M

Average Base  
Price  
104.22K

Number Of  
Models  
17

Average  
Horsepower  
367.46

## Insights

Average car prices increased steadily from 2020 to 2025.  
Petrol cars recorded the highest energy consumption and sales volume.  
GLC, E-Class, and GLE models showed the highest average horsepower.  
Black was the most preferred car color among customers.

## Insight

The attrition rate was 16.2%, which is higher than the expected benchmark, indicating a potential retention issue.

Male employees showed a higher attrition rate compared to females.

The Research & Development (R&D) department had the highest attrition and training participation, followed by Sales.

Despite high engagement in training and travel activities, R&D still recorded the highest turnover.

Higher income in R&D did not prevent employee attrition.

**Tools:** Power BI |  
Excel | Python

## Description

Analyzed employee data to identify key factors influencing attrition and workforce behavior.

Performed exploratory data analysis (EDA) using Python to uncover patterns in employee attrition and demographics.

Built an interactive dashboard in Microsoft Power BI to visualize attrition rate by gender, department, and job role.

Used Excel for data cleaning and preparation before analysis.

## 🧠 Description:

Interactive supermarket sales dashboard built using Power BI to analyze sales trends, branch performance, and profitability through KPIs and visual insight

# Description

Interactive Hotel Booking Analysis dashboard built to analyze guest behavior, booking trends, cancellations, hotel performance, and market segments for City Hotel and Resort Hotel

## Tools

Power BI | SQL | Power Query | DAX

## Insights

Online TA was the highest-performing market segment in hotel bookings.

Adults represented the largest guest category among all customer types.

Most booking cancellations came from the Online TA segment.

City Hotel recorded higher cancellation rates compared to Resort Hotel.

Weekday stays were slightly higher than weekend stays.

Booking and cancellation trends remained relatively stable between 2015–2019.

Reservation status analysis showed close values between canceled and confirmed bookings.
